

## **Safety Policy Statement**

### **The Directors of the Company: GB Access Limited**

- The Company will ensure that all reasonable human, financial and technical resources are applied to all aspects of the business undertaking, regarding health, safety and welfare requirements.
- The Company will produce a Safety Policy encompassing the central administrative and support functions and all defined construction works both on the company premises and client locations.
- The Safety Policy is structured to advise both employees and clients of the safety management systems in place, ensuring workplace safety and statutory compliance.
- This Safety Policy will be reviewed regularly and revised accordingly as and when legislation and policy dictates.
- To this end the Company will provide quality training to maintain comprehensive knowledge of work, equipment and legislation.
- Ultimately the Company at the forefront of its planning and operations, will conduct its business as far as reasonably practicable, without risk to the health, safety and welfare of its employees and others, recognising also its moral duty of care and regard for the protection of the environment. Employees are empowered to prevent work continuing which may have significant risk without being penalised.
- The company takes due consideration in working with our customers and informing them on the British Standard BS7212:2006 Code of practice for the safe use of construction hoists.
